C Transform

O ==(Object other) → bool

Transform class - widgets library - Dart API

Transform

dark_mode

This example rotates and skews an orange box containing text, keeping the top right corner pinned to its original position.

[link](#)

```
ColoredBox(  
  color: Colors.black,  
  child: Transform(  
    alignment: Alignment.topRight,  
    transform: Matrix4.skewY(0.3)..rotateZ(-math.pi / 12.0),  
    child: Container(  
      padding: const EdgeInsets.all(8.0),  
      color: const Color(0xFFE8581C),  
      child: const Text('Apartment for rent!'),  
    ),  
  ),  
)
```
